BUSINESS SYNOPSIS:

Candy is a special treat that plays an important role in cultural traditions, seasonal celebrations and family occasions. It's a recession-resistant industry with over \$23 billion annual sales and consistently strong growth. The store features bright colors, music, decorative pieces that suggest imitation candy-making machines and an "amusement park" atmosphere for children and adults to enjoy while they shop. Great location in an active shopping mall. They sell candy that's factory made, brand name as well as some they make themselves. There's plenty of sales/earnings growth potential for a new owner who has fresh drive and enthusiasm.
